

The Center for Ethics and Leadership

St. Edward's University *Programs for Fall 2004*

The Mission of the Center for Ethics and Leadership at St. Edward's University is to provide an organizing focus for curricular studies and co-curricular activities stemming from our Holy Cross and Catholic heritage and from our University Mission Statement's commitment to the dignity of all individuals.

The center provides assistance for new programs in ethics, and provides support and training for continuing the development of faculty, staff, and student understanding and commitment to these goals in their work at St. Edward's and in their lives. The center also initiates cooperative efforts to reach beyond our campus and support the development of ethical integrity and moral leadership in our communities.

For more information contact Dr. Phillip Thompson, Director of the Center for Ethics and Leadership
